Revenue Operations Analyst

Professional Summary

Business Operations Analyst with 3+ years of experience running sales and expense analysis, billing audits, and supplier cost recovery in a live business, contributing to INR 3+ lakh in annual profit improvement. Building toward Revenue Operations and Sales Operations roles, with two end-to-end case studies on synthetic B2B SaaS data covering pipeline diagnostics, churn and renewal risk, and CRM data governance. Works in SQL, Power BI, Excel, and HubSpot CRM, with a focus on turning analysis into prioritized, owner-assigned recommendations.

Work Experience

Business Operations Analyst May 2023 – Present

RK Enterprises *Bengaluru, India*

- Ran a weekly sales and expense analysis cadence to identify cost and revenue optimization opportunities, supporting operational reporting and forecasting
- Built and executed a structured outreach process to grow the client pipeline, engaging 30+ prospective institutional accounts and converting four into new business
- Recovered INR 35,000–40,000 in underbilled revenue through manual billing audits and reduced per-unit input costs by 17–20% through supplier renegotiation, together improving annual profit by INR 3+ lakh
- Analyzed revenue and cost data across a 10-day inventory review cycle spanning 2,000–3,000 SKUs annually, reducing unsold inventory by an estimated INR 1–2 lakh

Projects

Pipeline Diagnostic & Revenue Forecasting — Q3 Slowdown Analysis | *Case Study (Synthetic B2B SaaS Data)*

SQL, Power BI, Excel, HubSpot CRM, Python

- Diagnosed a Q3 bookings slowdown across a 401-deal, 200-account synthetic B2B SaaS pipeline by auditing HubSpot CRM data quality and running a 25-query SQL analysis, isolating a Demo-stage bottleneck holding over 50% of open pipeline value
- Identified a high-volume lead source converting at less than half the rate of the top-performing source (9.1% vs. 23.1% win rate) and modeled $70,900 in recoverable weighted pipeline value from resolving the bottleneck
- Built a 3-page Power BI dashboard (Pipeline Health, Rep Performance, Forecast) and an Excel scenario-forecasting model to operationalize findings for ongoing pipeline monitoring
- Delivered a prioritized decision log and impact tracker translating technical findings into ranked, owner-assigned recommendations for Sales and Marketing Ops

Renewal Risk & Expansion Analysis — Post-Sale Revenue Review | *Case Study (Synthetic B2B SaaS Data)*

SQL, Power BI, Excel, HubSpot CRM, Python

- Diagnosed a post-sale revenue slowdown across a 180-customer synthetic B2B SaaS base via a 25-query SQL analysis, isolating SMB churn at 4x the rate of Enterprise (60.4% vs. 15.2%) as the primary growth constraint
- Designed a customer health-scoring methodology and backtested it against historical churn outcomes (100% churn for 'At Risk' accounts vs. 23.7% for 'Healthy'), and identified a churn concentration at month 6 of tenure
- Built a 3-page Power BI dashboard (Customer Health, Renewals, Expansion) and an Excel forecasting model estimating $12,542 in incremental expansion revenue achievable by closing the SMB-to-Mid-Market gap
- Designed a HubSpot workflow to flag at-risk accounts one month ahead of the historical churn spike, documenting a CRM tooling limitation encountered during implementation

Skills

Revenue & Sales Operations: Pipeline & Funnel Analysis, Revenue Forecasting, Win-Rate & Conversion Analysis, Churn & Retention Analysis, Customer Health Scoring, Revenue & Billing Audit, SaaS Metrics (MRR, ARR, NRR, GRR, CAC, LTV, Pipeline Coverage)

Data & Analytics: SQL (Joins, CTEs, Window Functions, Aggregations), Power BI (DAX, Data Modeling, Dashboard Design), Microsoft Excel (Scenario Modeling, Advanced Formulas), Python (Pandas)

CRM & Business Systems: HubSpot CRM (Deal Pipelines, Lifecycle Stages, Workflow Automation, Data Import & Audit), CRM Data Governance

Business Operations: Stakeholder Communication, Process Improvement, Cost Analysis & Supplier Negotiation, Inventory Analysis, BRD Writing

Education

CHRIST (Deemed to be University) Bengaluru, India

Master of Computer Applications (MCA) *Expected May 2027*

JAIN (Deemed to be University) Bengaluru, India

Bachelor of Computer Applications (BCA) *May 2025*
